Methods of capital budgeting

Internal Rate of Return (IRR)

For NPV computation a discount rate is used. IRR is the rate at which the NPV becomes zero. The project with higher IRR is usually selected.

Profitability Index (PI)

Profitability Index is the ratio of the present value of future cash flows of the project to the initial investment required for the project.

WELCOME

Methods of capital budgeting

Internal Rate of Return (IRR)
The IRR is the discount rate that makes the NPV of a project equal to zero. The project will be accepted if the IRR is greater than the required rate of return.

Profitability Index (PI)
The PI is the ratio of the present value of future cash flows of the project to the initial investment required for the project.
